

Questionnaire for beneficiary progress assessment

This questionnaire covers all the learning processes implemented during an integration process. It makes it possible to assess both what the refugees / migrants think they have learned and the importance they give to the different learning parts. It can be used at different stages of the accompaniment program, distributed to beneficiaries as a self-assessment template or as part of discussions between the tutor and the beneficiary.

Questionnaire for beneficiary progress assessment			
	Acquisition / progress within the framework of the device		How important for you (1-no 2-rather 3-much)
